POLAR SHIP / MM sailing Antarctic waters

When it is not possible to determinate the exact position of a ship, such as Polar Boats, Icebreakers and any kind of /MM sailing Antarctic or Sub-Antarctic waters, WAP staff did agree that, when position is not marked on the QSL at the moment of contacts, or in lack of details confirming the exact position of the ship, dates between October and March could be OK for a provisional judgement. In any case information on this matter are normally posted on WAP site.

WAP QSL Gallery
